Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☐ Responsive to communication(s) filed on ____.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

DETAILED ACTION

Election/Restrictions

- I. Claims 1-16, drawn to a system and method of playing a game, classified in class 463, subclass 51.
- II. Claims 17-21, drawn to a method of making a display strip, classified in class 40, subclass 452.

Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention II has separate utility such as the display strip can be utilized for other games and purposes. See MPEP § 806.05(d).

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

During a telephone conversation with Trueman H. Denny III on February 3, 2004 a provisional election was made without traverse to prosecute the invention of Group I, claims 1-16. Affirmation of this election must be made by applicant in replying to this Office action. Claims 17-21 are withdrawn from further consideration by the examiner, 37 CFR 1.142(b), as being drawn to a non-elected invention.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

Art Unit: 3713

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-16 are rejected under 35 U.S.C. 102(b) as being anticipated by Brucker et al (USPN 4,487,583).

Brucker, in FIGS. 1-4, col. 2:29-67 and col. 3:21-67, illustrates and discloses a system and method of playing a game comprising applying at least one display strip to at least one player, wherein the display strip comprises a plurality of lights and wherein the lights are capable of displaying images, receiving input from at least one player, providing out signals to the display strip and displaying images on the display strip. Brucker, in col. 2:29-67, col. 3:21-67 and col. 4:62-67, discloses providing output signals indicative of the player's status in the game and displaying the player's status in the game on the display strip. Brucker, col. 3:21-67 and col. 4:62-67, discloses the display strip comprises a plurality of display strips and at least one player comprises a plurality of players, and wherein the step of applying at least one display strip to at least one player comprises applying at least one display strip to each player. Brucker, in col. 3:21-67 and col. 5:6-37, displaying each player's game status, providing output signals from a game processor, receiving input provided by a simulated weapon shot. Brucker, in FIGS. 1-7, col. 3:21-67, col. 5:6-37 and col. 11:4-20, discloses a processor, a plurality of input devices in communication with the processor, at least one sensor, wherein the sensor is capable of sensing radiation from a simulated weapon firing and providing an output to the processor in response to the simulated weapon firing. Brucker, 3:21-67, col. 5:6-37 and col. 11:4-20, discloses the processor comprises a hand-held microprocessor capable of executing stored game information.

Art Unit: 3713

Brucker, in col. 9:45-67 and col. 11:17-21, discloses emitting an audible sound from the display strip.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to R. Mendoza whose telephone number is (703) 305-7345. The examiner can normally be reached on Monday-Friday from 8:00am to 5:00pm.
